

Software Developer - Data Engineering & Artificial Intelligence Student

Daniel Fernando Parra Diaz

📞 3196970682 3197804333 danielferparradiaz@gmail.com 🌐 github.com/danielferparradiaz

Professional Profile

Full-Stack Software Developer with experience in the design, development, and implementation of backend, frontend, mobile, and data processing solutions. I have worked with a variety of languages and technologies to build distributed applications, APIs, web platforms, and event-driven systems, selecting the most suitable tools according to the requirements of each project.

On the backend, I have experience with microservices architectures using Java and the Spring ecosystem (Spring Boot, Spring Cloud, WebFlux, Spring Security, and OAuth2), as well as developing APIs and services with Node.js, NestJS, Express, and PHP/Laravel. I also have experience with containerization and orchestration using Docker and Kubernetes, deployments in Linux environments, and automation through continuous integration and continuous delivery (CI/CD) pipelines.

In data engineering and distributed systems, I have worked with Apache Spark for large-scale data processing, Apache Kafka for messaging and event streaming, and Debezium for Change Data Capture (CDC) strategies in event-driven architectures. I also have experience in relational and non-relational data modeling, applying normalization principles and design tailored to business needs.

I have experience with relational and NoSQL databases such as PostgreSQL, MySQL, SQLite, Redis, and Neo4j, including graph-based modeling, Cypher queries, and exploration of approaches related to relationship analysis, neural networks, and Transformer-inspired architectures applied to graphs.

In frontend and mobile development, I have participated in building modern web applications using Angular, Svelte, SvelteKit, React, and technologies related to interface design and user experience. I also develop mobile applications both natively with Swift, SwiftUI, and the iOS ecosystem, as well as with Flutter and Dart for cross-platform solutions on iOS, Android, and Web.

I complement my experience with training in Data Engineering and Artificial Intelligence, maintaining a constant focus on learning, adopting new technologies, and developing scalable, maintainable solutions aligned with business goals. I stand out for my adaptability, analytical thinking, and collaborative work in multidisciplinary teams.

Experience

Carvajal Tecnología y Servicios

Study Internship - Innovation Area (Full-Stack Developer)

Hybrid Apr 2022 - Jul 2023

- Execution and development of new components from a graphic base in Figma into code using Angular (PrimeNG, PrimeFlex).
- Update of legacy component source code, visual adjustments, and data structure.
- Development and fulfillment of user stories (US) and their requirements.
- Management and update of source code through Git.
- Daily reports on development progress and requirements in daily stand-up meetings.
- Presentation and implementation of new developments in delivery reviews (Sprint reviews).
- Integration and pull request submission for compliance repositories via Azure and git.

Smart & Safe (Servi-Salud-Api)

Junior Developer

Remote Jan 2022 - Apr 2022

- Maintenance of PHP and Laravel source code through Git.
- Adjustments to the Excel and PDF generator.
- Visual adjustments to tables and views using Bootstrap.

Skills Summary

- **Languages:** PHP, JAVA, SQL, Dart, JavaScript, TypeScript, Python, Objective-C.

- **Frameworks:** Angular, NodeJS, Spring Boot, Flutter, Bootstrap, Suit PrimeFaces (PrimeNG, PrimeFlex), Angular Material, Laravel, SwiftUI, Svelte, SvelteKit, ReactJS, NestJS
- **Platforms:** Linux, Windows, AWS, Azure, Google Cloud.
- **Tools:** Git, GitHub, PostgreSQL, MySQL, SQLite, Docker, Xcode, Kubernetes, Apache Spark
- **Soft Skills:** Presentation, planning, organization, creative problem-solving, teamwork, active listening, adaptability, analytical thinking.

Education

SENA* Certificates can be verified here, ID: 1144107895

Software Programming Technician

Cali, Colombia Feb 2023 - Feb 2024

Relevant Courses: Software Architecture and Modeling, Programming Logic, Thesis project using PHP Laravel and Bootstrap (Ecommerce).

Complementary Virtual Course

Apr 2022 - Jun 2022

Complementary virtual course on cybersecurity concepts.

Relevant Courses: ISO 2700 Standard.

Virtual Course

Oct 2020 - Dec 2020

Complementary virtual course on information systems programming methodology.

Relevant Courses: Introduction and Guide to Android Studio.

Special Course

Sep 2022 - Oct 2022

Special course on entrepreneurial behavior.

Certifications on Educational Platforms

- Master in SQL Server: From zero to professional level [2024] [Udemy](#)
- Complete web development with HTML5, CSS3, JS AJAX PHP and MySQL [Udemy](#)
- Angular University - From zero to expert in Angular [Udemy](#)
- Spring Framework 6 & Spring Boot 3 from zero to expert 2024 [Udemy](#)
- Complete guide to JUnit and Mockito includes Spring Boot Test [Udemy](#)
- AWS Certified Cloud Practitioner in Spanish (CLF-C02) - 2024 [Udemy](#)
- Reactive programming with Spring Boot and Spring WebFlux [Udemy](#)
- Microservices with Spring Boot and Spring Cloud Netflix Eureka [Udemy](#)
- DevOps with Docker, Jenkins, Kubernetes, git, GitFlow CI and CD [Udemy](#)
- Spring Security 6 Zero to Master along with JWT, OAUTH2 [Udemy](#)
- iOS & Swift - The Complete iOS App Development Bootcamp [Udemy](#)

Other Special Courses and Certifications

- High School Diploma *Department of Education of Santiago de Cali* [SENA](#)
- Software Analysis and Development (Virtual) [SENA](#)
- Platform and Services Development on AWS [SENA](#)

Languages

- **Spanish:** Native
- **English:** Advanced
